

### Peer Review #1: "PicReport" Application

You have come up with a very good project. I never really realized how much the language barrier effects how people gather statements. I enjoyed reading about your idea to use images in replacement of words. In the beginning of your proposal, I was a little confused as to what you meant. However, as I continued to read I found everything to be clearer.

My one main concern is that this project might be too much to take on within the semester. However, you have provided a detailed timeframe and by taking the courses Web Development and Mobile Development you might be able to accomplish your project goal.

In terms of your hypothesis, you have written out a clear and well-formed statement. Your thesis is about the use of images as a tool to provide law enforcement with accurate information in situations where there is a difference in language. By having a well-written thesis it is easy for me to understand the rest of your proposal, because I am able to keep in mind what you are trying to accomplish.

Finally, your proposal is overall very well written, especially the timeline. You have a great flow and explain things in a clear manner. You clearly took the time to make sure that you did not leave any gaps in the document. Overall, this is a very good proposal and I wish you luck in accomplishing it.
