

Peer Review 2

Title

1. Is there a title? Does the title adequately describe what the draft is about?

In the paper that was given to me, there should be a title written somewhere. As of now there is no title. You should add it on the first page and also you need to change 'contents' to 'table of contents'

Main Points

1. List the main points made in the draft, in order that they are presented in the paper.

The main points that the writer focuses on are as follows:

1. Which kind of data framework prompts high money related execution of banks
2. Assess in what particular routes and to what degree do data framework could in long run lead to more money execution.
3. Find out what issues develops while performing IT at the Men's Warehouse.

2. Which main points need more support? (More evidence, more tables/figures, more references, etc.)

According to me, you would need to add more evidence on points 1 (states in question 1).

3. Which main points (if any) should be eliminated, as they do not contribute to the overall theme of the paper?

I don't think you need to take anything out from the paper as it goes well in describing what the company itself does. It is very helpful for the reader to understand your paper as they have the background information from what you have written to reference them.

4. Are the main points out of order? If so, how would you reorder the paper?

No, the main points are not out of order. You just the to add in more evidence/support for point 1 because as a reader I was little confused as to understand if you even talked about it or not.

Citations

1. Are there at least 10 references?

There are only nine references given as of now. There should be more references added. At least one more so basic requirement can be accomplished.

2. Is each of the references cited at least once in the paper?

Yes, there is a reference page at the end of the essay.

2. Is the APA style of in-text citations and references used?

When you put the title of 'Reference' before that you need to add double space as in APA style it should be done that way. But everything else looks good as APA format has been used throughout the rest of the paper.

Wording and Formatting

1. If technical jargon is used, is it is defined and explained clearly?

I did not find any hard words or Jargon in the paper. Everything is defined and well explained when needed and where it was needed.

2. Is the paper readable by a novice in the field?

Yes, it is easy to understand for a person who does not know a lot about the company or what it even does. The writer has well explained what the company does and what it is famous for. They have also very well written what further research was needed to complete the project and even told that “40% of the project is completed.”

3. Is the paper at least 10 pages?

The paper is only 9 pages long not including the reference page. You (the writer) need to add a little bit more information in order to complete the basic 10 page requirement for the assignment.

4. Are the sections and headings appropriate for the content within them?

All the sections are tilted corrected expect what I had mentioned in the first question under the section Title. Please look at that question

Final Thoughts

1. In two to three sentences describe the thesis of this paper?

The thesis of the paper is

One spelling mistake that I noticed was when you start writing under the Project Plan’ it should start with “In the world...” instead of “’n the world...”

2. After reading the paper, is the thesis supported?

Yes the thesis is well supported with in text citations and references given at the end of the paper. Just try to add a bit more for point one (mentioned in question 1). Moreover, you need to add a little bit more with evidence for point one through which you will complete the 10 page paper requirement for the assignment as well.

3. What kinds of information, if any, are missing?

As you have a section for the honor pledge you need to add it in that section because as of now that page is empty.

5. What was the single most important thing said in the paper?

According to me that most important thing that is said in the paper is what you said in the end. You mentioned that there still needs to be work done for this project and even mentioned how much the project has come this far. You even mentioned that through this project you will come to know that if the IT department is good for the company or not or are they just wasting their money/funds for the IT department which I think is well written.
